PROFESSIONAL SUMMARY

Software Quality Assurance Engineer with around 3 years of experience in Manual and Automation Testing in the Transportation and Logistics Domain. Skilled in writing and executing test plans, test cases, and test scripts using Selenium WebDriver with Java and Postman for API testing. Hands-on experience in System, SIT, Sanity, Regression, and API Testing across enterprise platforms in Agile/Scrum-based projects. Proficient in tools like TFS (Azure DevOps), Postman, and OpenShift. Experienced in Software Testing Life Cycle (STLC), Software Development Life Cycle (SDLC), mainframe testing using TSO/ISPF and Endeavor, and Kafka message queue validation. Strong communicator, Agile team player, and detail-oriented in defect tracking.

TECH SKILLS

Languages :	Java
Testing Tools :	Selenium WebDriver, TestNG, Maven, Postman, Load Runner
Bug Tracking & Test Management :	TFS (Azure DevOps)
Cloud & Infrastructure :	OpenShift, Mainframe (TSO/ISPF, Endeavor)
Database & API Testing :	SQL, Postman API, Web Service Testing, Kafka
Methodologies :	SDLC, STLC, Manual & Automation Testing, Agile / Scrum
AI Tools :	GitHub Copilot
Certifications :	AI Aware – Intel & Digital India AI Appreciate – Intel & Digital India Java & Selenium – Green Technologies Fundamentals of Capital Market – NSE Academy

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions (Programmer Analyst – QA Testing) Aug 2022 – Present

Client: UPS (United Parcel Services) | Domain: Transportation & Logistics

- Delivered QA testing solutions for enterprise clients in Transportation and Logistics.
- Analyzed Business Requirement Documents (BRDs) and Technical Design Documents (TDD) to identify testable requirements.
- Developed and managed Test Plans, Test Scenarios, Test Cases, Test Execution, and Test Closure documentation.
- Involved in System, SIT, Sanity, and Regression Testing for OEF and OPSYS functionalities.
- Created API testing strategy including scope, tools, and methodologies; performed API testing using Postman.
- Validated API responses, authentication flows, and database consistency; ensured APIs met reliability, scalability, and performance standards.
- Designed SQL queries to verify data integrity between API requests and database updates.
- Implemented automated testing for API integrations using Selenium and Java.
- Logged and tracked defects in TFS (Azure DevOps); actively participated in Agile ceremonies.
- Tested Microservices deployed in OpenShift and validated Kafka message queues for real-time processing.
- Defined and implemented mainframe testing strategy including job scheduling and test data management using TSO/ISPF and Endeavor.
- Prepared KT documents, mentored team members, and prepared weekly/monthly status reports shared with clients.
- Understood customer requirements and prepared questionnaires and clarifications.

PROJECTS WORKED WITH

Project 1 : EIMS – UPS

2024 – Present

Domain: Transportation & Logistics — Tools: Java, Selenium, Postman, TFS, OpenShift, Kafka

- Created API testing strategy including scope, tools, and methodologies.
- Analyzed Business Requirement Documents (BRDs) and Technical Design Documents (TDD) to identify testable requirements.

- Developed and managed Test Plans, Test Scenarios, Test Cases, Test Execution, and Test Closure documentation.
- Performed API testing using Postman — validated responses, authentication, and database consistency.
- Ensured APIs meet reliability, scalability, and performance standards.
- Designed SQL queries to verify data integrity between API requests and database updates.
- Implemented automated testing for API integrations using Selenium and Java.
- Logged and tracked defects in TFS (Azure DevOps); actively participated in Agile ceremonies.
- Tested Microservices deployed in OpenShift and verified Kafka message queues for real-time processing.
- Defined and implemented mainframe testing strategy including job scheduling and test data management using TSO/ISPF and Endeavor.
- Understood customer requirements and prepared questionnaires and clarifications.
- Prepared KT documents, mentored team members, and shared weekly/monthly reports with clients.

Project 2 : OEF – UPS**2023 – 2024**

Domain: Transportation & Logistics — Tools: Java, Selenium, Postman, TFS

- Involved in System, SIT, Sanity, and Regression testing for OEF functionality.
- Analyzed BRDs and TDDs to identify and document testable requirements.
- Developed test plans, test scenarios, and test cases for end-to-end functional coverage.
- Executed manual test cases and logged defects in TFS; participated in defect triage meetings.
- Performed API testing using Postman; validated response payloads and data consistency.
- Collaborated with cross-functional teams in Agile ceremonies including sprint planning and daily stand-ups.
- Generated status reports and defect summaries for QA leads and client stakeholders.

Project 3 : OPSYS – UPS**Aug 2022 – 2023**

Domain: Logistics — Tools: Java, Selenium, OpenShift, ADO

- Created test cases, RTM, and scenarios for functional and automation testing.
- Executed the manual test cases and logged defects in JIRA.
- Validated the logs in OpenShift for integration testing.
- Identified the Regression candidates and worked on Automation Scripting.
- Supported Script execution and debugging for releases.
- Generated daily status reports and defect summaries for QA lead.
- Contributed to regression test cycles, build validations, and UAT test execution.

EDUCATION

Master of Computer Application (MCA)**Expected Graduation: 2027**

Vellore Institute of Technology (VIT), Chennai

Bachelor of Commerce (B.Com)**Graduated: 2022**

SDNB Vaishnav College for Women, Chennai

SOFT SKILLS

-
- | | |
|---|--|
| • Analytical Thinking and Problem Solving | • Communication and Stakeholder Management |
| • Attention to Detail | • Teamwork and Collaboration |
| • Adaptability in Fast-Paced Environments | |
-
