

RAKESH E

Cloud DevOps Engineer | AWS | Docker | Jenkins | Python | Terraform | Kubernetes
+91 8667699526 | Chennai | rakeelango@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Cloud DevOps Engineer with 5+ years of experience building CI/CD pipelines, containerized workloads, and cloud-native infrastructure on AWS using Jenkins, Docker, Kubernetes, and Terraform. Proven expertise in blue-green deployments, Kubernetes orchestration, and production monitoring ensuring high availability, scalability, and **99%+** system uptime. Adept at driving cost optimization, Agile delivery, and continuous service improvement — recognized with the Pinnacle Award 2025 and 4 industry certifications.

SKILLS

Languages: Python, Bash, SQL
Cloud Platforms: AWS – S3, Redshift, Lambda, Step Functions, Event Bridge, EC2, EMR, CloudWatch, ECS, EKS
Orchestration & Deployment: Kubernetes (Namespaces, Deployments, PV/PVC, RBAC, Helm), Blue-Green Deployment
Databases & Warehousing: AWS Redshift, RDS
CI/CD & Version Control: Jenkins, GitHub, Docker Hub, GitHub Actions, Nexus Repository
Infrastructure as Code: Terraform
Monitoring & Observability: Datadog, AWS CloudWatch, Log Analysis, Alerting, Incident Tracker
Containers: Docker (Docker file, multi-stage builds, Image optimization, Docker Compose)

EXPERIENCE

Sopra Steria Limited | Client: Financial Conduct Authority (FCA), UK April 2021 – Present
Cloud DevOps Engineer Chennai, India

- Implemented blue-green and stateful deployments on Kubernetes (EKS) using Helm charts, enabling zero-downtime releases across **3 environments** — cutting rollback time from **30 minutes to 2 minutes** and reducing deployment failures by **70%**.
- Orchestrated Python workloads on AWS Lambda, Step Functions, and EMR, processing **1,000–2,000 files daily** from S3 into Redshift using Docker and Kubernetes (EKS), ensuring **99%+** pipeline continuity and data accuracy.
- Led full Incident/Change/Problem lifecycle management using ITSM tools and Incident Tracker, performing RCA and post-incident reviews; monitored cloud infrastructure via AWS CloudWatch and Datadog — reducing false positives by **35%** and maintaining **99%+** system uptime.
- Delivered Continuous Service Improvement (CSI) initiatives including automated Python validation scripts, Terraform-based infrastructure-as-code, and BAU batch processing monitoring across AWS services — reducing manual effort by **4 hours per day** and Cost Optimization.
- Spearheaded end-to-end migration from legacy ETL platform to AWS native services (Lambda, EMR, Step Functions); maintained GitHub version-controlled codebase and prepared CIPs, SOPs — cutting processing turnaround from **3 days to 2 hours**.

PROJECTS

Trend Store – Full Stack DevOps Project | Jenkins · Docker · Kubernetes · Grafana · GitHub

- Implemented end-to-end CI/CD pipelines using Jenkins, GitHub, Docker, and Kubernetes (EKS) to automate build, deployment, and release processes — reducing manual deployment effort by **80%** and deployment time from **45 minutes to under 10 minutes**.
- CI/CD Workflow:** Code Commit → GitHub → Webhook → Jenkins Pipeline → Build → Docker Build → Push Image → Deploy to Kubernetes → Monitor via Grafana.

ReactJS E-Commerce Application | Docker · Jenkins · GitHub · Docker Hub · Multibranch Pipeline

- Developed a full-stack e-commerce application using ReactJS with automated CI/CD deployments via multi-branch pipelines and containerization — reducing manual effort by **90%** and accelerating release cycles from **3 days to 4 hours**.
- CI/CD Workflow:** Push to dev branch → Image build & push to Docker Hub dev repo; Merge to master → Image build & push to Docker Hub prod repo + Deploy.

EDUCATION

Anna University Aug 2016 – April 2020
B.E – Computer Science and Engineering | First Class

CERTIFICATIONS & AWARDS

HCL GUVI – Advanced DevOps & Cloud Engineering Program | AWS Certified Developer – Associate |
Oracle Cloud Infrastructure 2024 – Generative AI Professional | Databricks Generative AI Fundamentals
Awards: Spot Award 2023 & 2024 – Operational Excellence and Incident Handling | Pinnacle Award 2025 – Independent Deployment Management and SME Leadership
